- E. SESSION SUMMARY

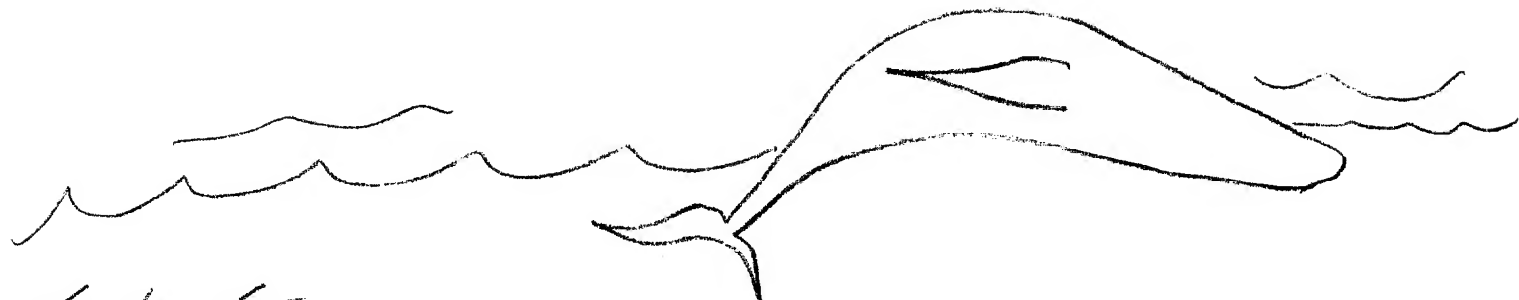

The theme of the document series target is "save the species". I could see whales moving through the water and space. This site has to do with interplanetary and environmental issues. A type of animal may be featured as a focus of concern. The letter S and the word super may be referred to in the document. The target revolves around a certain positive activity or track in response to our world. A circular or secular trek is the area where there is attention and movement of energy. It may involve an animal's journey.

## BINARY STARS: ODD COUPLES

A MINORITY OF ONE,  
our sun has no companion  
star. But the majority of  
stars appear in company. Our  
nearest stellar neighbor,  
Alpha Centauri, is a three-  
star system, while Castor, in  
the constellation Gemini,  
must be counted as a trio of  
double, or binary, stars  
orbiting a common center.

When binary stars are  
close enough to interact with  
each other, they produce  
some of the most explosive,  
peculiar, and baffling events  
yet observed.
